Our Solutions

Dark Fibre

Our wholly-owned, managed and operated, state-of-the-art, dense metro network infrastructure offers direct routes between points of interest, enabling clients to achieve unmatched latency, flexibility, security, and scalability in their network design.

Datacentre Interconnect | Enterprise Interconnect | CLS Interconnect | Data Backhaul

Custom Network Infrastructure

We design, build and operate mission-critical network infrastructure for the most demanding of client requirements. Including enabling leading hyperscalers and datacentre operators with custom connectivity solutions that are scalable and cost-effective.

Customised to Your Needs | Scalable as You Grow | Expert Routing & Design

Our Approach

Build

We build dedicated conduit and cable infrastructure that forms the backbone of future-ready networks.

Own

Our infrastructure is wholly-owned and fully diverse from other suppliers. We don't use 3rd party infrastructure.

Engineer Performance

We ensure the shortest, lowest latency paths through dedicated data-centre-to-data-centre DF.

Design for Scalability

Full ownership of pit and pipe/conduit network allowing customers easy access to scale their requirements.

Offer Convenient APAC Coverage & Consistency

The only DF provider that can offer a single contract covering 7 regions within APAC while delivering a consistent experience.

Our Network

XenithIG owns, operates, and maintains high-density, critical infrastructure delivering resilient fibre optic networks connecting data centers, cable landing stations, and enterprise buildings throughout the Asia Pacific.
